

I PORTALDOC

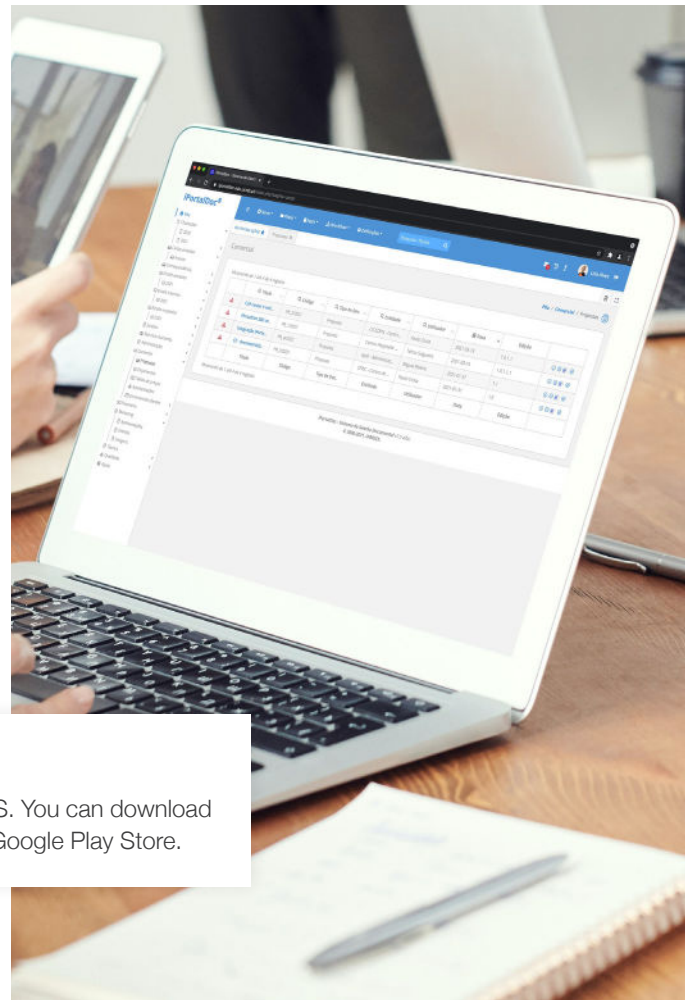

Connecting people to their Documents, Processes and Communications

Inserting documents, associating them with each other or with emails, forwarding documents simultaneously, with and without pending action, linking them to different folders or consulting associated documents, are just some of the iPortalDoc features.

With iPortalDoc, you ensure the efficiency of your company's processes while holding those involved accountable. The system notifies users of pending actions and allows them to check, at any time, the status of a particular process.

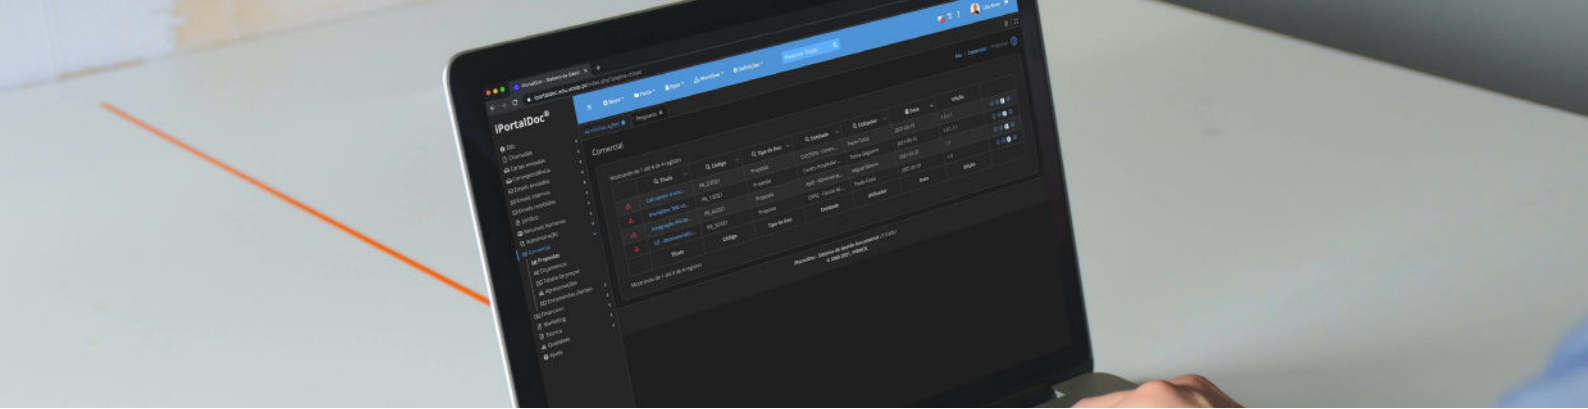

iPortalDoc Advantages

- Single and centralized repository;
- Advanced search options;
- Standardization of documents, processes and archival criteria;
- Automation of business processes;
- Document dematerialization (digitization of processes);
- Sending invoices with digital signature;
- Security and confidentiality when accessing information (GDPR compliance);
- Version control of documents/processes;
- Integration with ERPs, CRMs and OCRs;
- Email archive management;
- Monetization of physical and digital space;

iPortalDoc Mobile

iPortalDoc has an APP for Android and IOS. You can download the application from the Apple Store and Google Play Store.

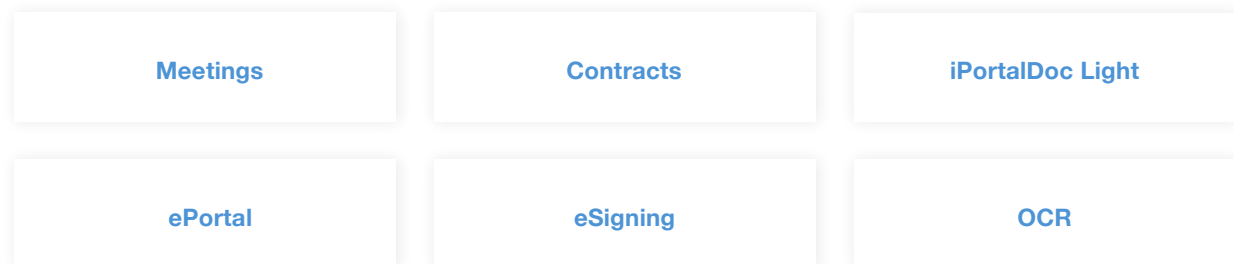

We model Processes adapted to the reality of each business

Examples of processes and sub-processes that adapt to different Activity Sectors (Health, Education, Commerce, Services, Industry, etc.)

Modules

Add complementary modules to iPortalDoc that meet your company's needs.
